Welcome to the ASN Creation Wizard

Welcome to the ASN Creation Wizard where the WebEDI Application will guide you through the process of creating an ASN. The process includes the following steps:

1. Select a Delphi Plant as the shipping destination, and a Vendor as the shipping source.
2. Complete ASN Header Information.
3. Select Containers.
4. Review the ASN details.
5. Review or alter serial numbers and generate labels as required.
6. Submit the ASN to Delphi for processing.

First Select the Destination Plant: DD22 - DELPHI DE SINGAPORE

Next Select the Source Vendor Code: N/A - 000T003000 - SAPQ(N3025)

NEXT CANCEL

Select the **NEXT** tab at the bottom of the page.

In the Production module your supplier codes will be linked to your Covisint ID.

DELPHIShipment Identification

The following is for One Level Packaging (sending one box or carton)

9

Supplier Training

1. Shipment Identification is actually the ASN number assigned to this shipment. It can only be 10 alpha/numeric characters in length.
The number you assign cannot be used again within a 12 month period. Many suppliers use their Packing Slip number.
2. Carrier Pro Number is the number assigned to this shipment by the carrier. The trucking firm can provide you with this number. If you can't get this number prior to shipment we allow you to put 4 zeros in this field.
3. Master Bill of Lading is a number the supplier provides to us. If you do not use the Master Bill of Lading you can repeat the Shipment Identification Number.
4. Carrier Identification – These are known as SCAC codes. They are abbreviations' of the carrier name. If you do not know your SCAC code contact transportation. Their number is in the Appendix of the training manual.

The following is for One Level Packaging (sending one box or carton)

10

Supplier Training

5. Equipment Number – The trailer number of the carrier's semi or truck.
6. The default is One Level Packaging. This means you are sending only one box.
If you send two or three boxes you must create the ASN for each box.
7. Gross Weight – Total weight of parts and box
8. Net Weight – Weight of parts only.
9. Weight unit of measure – Pounds or Kilograms
10. Select Next

DELPHIShipment Identification

If you are shipping only one box complete the following:

11

Supplier Training

11. Select material number (part number).
12. Add manufacturing duns number (duns number where part is manufactured).
13. Container type (box or carton).
14. Number of containers (1).
15. Material quantity per box (100)
16. Select Add.

Remember: When adding manufacturing duns number it will go in one field. Do not try to put three numbers in each field. It will fit in one. Do not put dashes or commas within the number. Example: 123456789

Welcome to the ASN Creation Wizard

Welcome to the ASN Creation Wizard through the process of creating an ASN. The process consists of the following steps:

1. Select a Delphi Plant as the shipping source.

2. Complete ASN Header Information.

3. Select Containers.

4. Review the ASN details.

5. Review or alter serial numbers and generate labels as required.

6. Submit the ASN to Delphi for processing.

First Select the Destination Plant:

DD22 - DELPHI DE SINGAPORE

Next Select the Source Vendor Code:

N/A - 000T003000 - SAPQN3025

NEXT

CANCEL

30. After ASN is submitted, you should see this screen.
